FOR IMMEDIATE RELEASE
March 1, 2017

Local Buy selects LIBERO by Insight Informatics as Preferred Supplier for Queensland Councils and Government Authorities!

Leading Procurement Services Provider for Government, selects LIBERO as a preferred solution for the provision of Library Management Systems & Services.

Brisbane, QLD, March 1, 2017— [Local Buy](#), a leader in the provision of procurement services for Councils and Local Government, and [LIBERO by Insight Informatics](#), global Library Management Solutions provider, are pleased to announce LIBERO by Insight Informatics appointment as a preferred/prequalified supplier of Library Management Systems & Services to Queensland Councils and Government Authorities. This arrangement established by Local Buy enables Councils and Local Government authorities to purchase a diverse range of goods and services from Local Buy suppliers without tendering.

The tender process for councils and government agencies can be stressful, time consuming and costly. As there are certain processes that every local government entity must follow, going out to tender to the open market can result in lengthy time frames and costly complications.

Councils and Local Government authorities using Local Buy approved suppliers such as LIBERO by Insight Informatics save significant time and money by eliminating the need to go to tender, while still being fully compliant with the Local Government Act 2009 and the Local Government Regulation 2012 in their procurement activities.

Insight Informatics was selected as a preferred supplier after an extensive tender and evaluation process by Local Buy. Insight Informatics has 30 years of experience providing library management solutions to

council and government sectors, with the flexibility to provide for the unique needs of any library no matter its size or type.

“Our products have already gone through a thorough and detailed process of evaluation as a part of the local buy acceptance so delivery can be fast tracked to benefit the client” said Sam Patane CEO of Insight Informatics.

The supplier engagement process is easy, fast and government organisations can access Local Buy arrangements at no cost. The Local Buy Contracts and Suppliers list is updated every fortnight on the Local Buy website. To issue and manage your Requests for Quotes (RFQ’s) online, register with Local Buy’s VendorPanel system via their website.

About LIBERO by Insight Informatics

LIBERO Library Management Software by Insight Informatics is proudly Australian owned, with all products designed, developed and supported in Australia to service our users worldwide. Developed in collaboration with librarians and industry specialists LIBERO strives to always be on the cutting edge of technology in the library management services arena.

Built from the ground-up to be entirely accessible through a web browser, each LIBERO solution has been developed to optimise flexibility for our libraries, minimise click-through and maximise the usability of information services for users. LIBERO interacts seamlessly with popular digital content enrichment services, is 100% web-based and mobile optimised, helping libraries worldwide navigate easily in the digital device arena. Continued product research and development leverages advantages offered by modern technology, and information management practice ensures LIBERO remains dynamic and relevant and functionally advanced.

LIBERO is THE solution for the Public, Special and Academic Library market, delivering excellent service, providing exceptional outcomes and building collaborative relationships with our customers. Our key objective at LIBERO is to grow beyond the role of a software vendor, to be a true technology partner to all libraries.
